Tobacco Related-Disease Burden age-adjusted rate/100,000 population

| County | Death rate | | | | Hospitalization rate | |
|---------------|------------|---------------|--------|----------------|----------------------|--------|
| | cancer | heart disease | stroke | COPD/emphysema | COPD/emphysema | asthma |
| Washington | 147.9 | 178.2 | 33 | 32.8 | 139.8 | 62.8 |
| State of Iowa | 167.7 | 172.9 | 35.6 | 46.9 | 176.8 | 77 |

Estimated adult cigarette smoking prevalence

Iowa Behavioral Risk Factor Surveillance System, 2006-2012

Washington: 16% (10.9% - 23.5%)

State of Iowa (2014): 18.5%

Youth any tobacco use prevalence

Iowa Youth Survey 2014

Washington: 22.4%

State of Iowa: 18.1%

Population counts are based on 2014 estimates from the U.S. Census Bureau. Adult prevalence estimates are self-reported rates and confidence intervals of rates of cigarette smoking in Iowans 18 and older. Youth rates are self-reported tobacco use rates in 11th grade students. Less than half of 11th grade students in these counties participated in the survey: Boone, Butler, Clarke, Dallas, Des Moines, Fremont, Keokuk, Jasper, Lee, Mahaska, Polk, Poweshiek, Washington and Wayne. In many cases, the percentages shown here for counties with low participation rates will reflect closely their actual rates. Youth any tobacco use includes e-cigarette use. *At least 5% of all county inpatient records are missing. Deaths are from 2010-14 for COPD and stroke and 2012-14 for heart disease and cancer. Hospitalizations are from 2009-11.
