Number of non-public schools in 2020-2021 school directory
 Number of public schools in 2020-2021 school directory
 Number of schools we received data from in 2020-2021

Count	Total Student Count	Total Match	Total No Match
174	38,284	29,351	8,933
629			
644			
		Total Percent Match	Total Percent No Match
		76.67%	23.33%

* School-Lead Data match refers to the electronic process of receiving the list of kindergartners registered in a particular school year from the elementary schools (public and non public) and comparing such list with the Iowa Department of Public Health's data of kindergartners who had at least one blood lead test. Total percent match means children who received at least one blood lead test. Total percent No match means children without a blood lead test in IDPH database. These are children who may need a blood lead test.
