</table>
| Arsenic poisoning               | Blood arsenic values equal to or greater than 70 μg/L                           | Weekly         | Routine reporting
|                                 | Urine arsenic values equal to or greater than 100 μg/L of urinary creatinine   |                | See EH Div Web page https://idph.iowa.gov/Environmental-Health-Services/Reportable-Conditions       |
| Cadmium poisoning               | Blood cadmium values equal to or greater than 5 μg/L                           | Weekly         | Routine reporting
|                                 | Urine cadmium values equal to or greater than 3 μg/g                           |                | See EH Div Web page https://idph.iowa.gov/Environmental-Health-Services/Reportable-Conditions       |
| Carbon monoxide (CO) poisoning  | Blood carbon monoxide level equal to or greater than 10% carboxyhemoglobin or  |
|                                 | its equivalent with a breath analyzer test, or a clinical diagnosis of CO poisoning  |
|                                 | regardless of any test result                                                  | Daily          | Phone: 800-972-2026 See EH Div Web page Or: Iowa Statewide Poison Control Center 800-222-1222 for 24 hour consultation followed by fax to IDPH EH. |
| Blood Lead Testing              | All analytical results greater than or equal to 20 micrograms per deciliter    | Daily          | Phone: 800-972-2026                                                                                     |
|                                 | (μg/dL) in a child under the age of 6 years or a pregnant woman                |                | All other analytical values for all blood lead analyses Weekly Electronic format specified by the department |
| Mercury poisoning               | Blood mercury values equal to or greater than 2.8 μg/dL                      | Weekly         | Routine reporting
|                                 | Urine mercury values equal to or greater than 20 μg/L                         |                | See EH Div Web page https://idph.iowa.gov/Environmental-Health-Services/Reportable-Conditions       |
| Methemoglobinemia               | Blood analyses showing greater than 5% of total hemoglobin present as methemoglobin | Weekly         | Routine reporting
|                                 | (recommend immediate)                                                         |                | See EH Div Web page https://idph.iowa.gov/Environmental-Health-Services/Reportable-Conditions       |
