BUREAU OF PROFESSIONAL LICENSING
IOWA BOARD OF PSYCHOLOGY

Before the Board of Examiners for the Licensing and Regulation of Iowa Board of Psychology

Petition by Timothy Foley, Aditi Rao,
Alex Bare et al for the adoption of rules
relating to Sexual Orientation Change
Practices

PETITION FOR
RULE MAKING

Text of Proposed Rule Amendment

IAC 645-242.2(33) is amended to read as follows:

New Section. 242.2(33) A licensed mental health provider shall not engage in sexual orientation change efforts for any patient under the age of eighteen. Sexual orientation change efforts are defined as any practice by a mental health provider that seeks to change an individual's sexual orientation, including but not limited to efforts to change behaviors or gender expressions or gender identity, or to eliminate or reduce sexual or romantic attractions or feelings toward individuals of the same sex. "Sexual orientation change efforts" do not include any of the following:

- (a) Counseling or therapy that provides acceptance, support, and understanding of the individual or the facilitation of an individual's coping, social support, and identity exploration and development, including sexual orientation-neutral interventions to prevent or address unlawful conduct or unsafe sexual practices.*
- (b) Psychotherapies that do not seek to change sexual orientation.*
- (c) Counseling for an individual seeking to transition from one gender to another.*

2. Statutory Jurisdiction of the Iowa Board of Psychology

Pursuant Iowa Code §147.55(9) licensing boards may establish by rule procedures and acts that are grounds for discipline or license revocation. Therefore, boards may establish additional licensing requirements and grounds for discipline based on those practices deemed detrimental to the public.

Pursuant to Iowa Code §147.55(3) boards may discipline a person on the grounds of knowingly making false or fraudulent claims in the course of professional practice, which is detrimental to the public.

Pursuant to Iowa Code §272C.3(1)(a), licensing boards may seek disciplinary procedures if a licensee under their purview that violate Iowa Code §147.55(9), as applicable. Given that this section provides for regulatory power over their area of jurisdiction therefore provides means of recourse against violations of rules promulgated by the board.

3. Arguments in Favor of Adoption

Sexual Orientation Change Efforts (SOCE) have been rejected as valid medical procedure and has little to no scientific backing among professionals. A professional task force established by the American Psychological Association has concluded that "Recent studies provide no sound scientific basis for determining the impact of SOCE on decreasing same-sex sexual attraction" This conclusion has been corroborated by multiple professional organizations.

Despite its scientific absurdity this process continues to operate throughout the United States, and has been found in some jurisdictions to be a form of consumer fraud in New Jersey (See *King v. Christie*). Further, a similar law passed in California was upheld as the court concluded that such a law does not violate the first amendment nor does it breach any kind of professional-client relationship. This decision was not appealed and as of the drafting of this petition this is the only litigation on the question of gay conversion therapy.

Although its support has been scientifically and legally rejected SOCE continues to exist in Iowa and the United States at large. It is estimated that one third of lesbian, gay, bisexual, transgender, or question young people will be subjected to these practices at some point during their teenage years. The same study by the American Psychological Association that declared these efforts lacked sufficient scientific foundation concluded that those who have been subjected to this form of pseudo therapy have "report experiencing serious distress, including depression, identity, confusion, and fear due to the strong prohibitions of their faith regarding same- sex sexual orientation, behaviors, and relationships." This depression is empirically linked to higher suicide rates later in life.

4. Underlying Statistics in Favor of Adoption

34% of LGBTQ individuals report having been sent outside the home to a therapist or religious leader to "cure, treat, or change their sexual orientation" during their teenage years. This correlates to suicidal thoughts and actions that are approximately four times higher than gay youth's heterosexual counterparts. According to a survey of 55 transgender young people 40% of young people have either attempted or seriously considered suicide compared with the national average of 17%.

5. Names and Addresses of Parties Favoring Adoption, including relevant groups

695 Signatories to an online petition urging action on the question of Sexual Orientation Change Efforts, whose names and postal codes are provided in Appendix I.

The interest of Iowa's young people, whose representatives have endorsed this legislation by a unanimous 22-0 vote who recognize the severity of the issue and prevent the course of action contained in this petition.

The Iowa LGBTQ community, specifically the young people, who have been subjected to this heinous practice oftentimes against their will and who seek to be accepted as full members of their society.

The following individuals who strongly urge the Board of Psychology to take action in the form of adopting the text of the rule written in part one of this petition.
