Living with HIV

Estimated total number of Iowans living with HIV.

HIV Diagnoses

Iowans diagnosed with HIV.

Linked to Care in 1 month

Diagnosed people who attended a medical appointment within a month of diagnoses.

Retained in care

Diagnosed people who are engaged in medical care.

Viral Suppression

People whose most recent viral load was less than 200 copies/mL.

May 2020
In 2019, 91% of Iowans diagnosed with HIV were linked to medical care within one month of diagnosis.

People who take Antiretroviral Therapy (ART) daily as prescribed and achieve and maintain an undetectable viral load have effectively no risk of sexually transmitting the virus to an HIV-negative partner. – Centers for Disease Control and Prevention, 2017

Undetectable = Untransmittable

May 2020
