Adolescent & Young Adult Health Care in Iowa
A Guide to Understanding Consent & Confidentiality Laws

Abigail English, JD, Center for Adolescent Health & the Law

March 2019
Contributors
This publication was created for the Adolescent & Young Adult Health National Resource Center by Abigail English, JD, of the Center for Adolescent Health & the Law, in collaboration with the Association of Maternal & Child Health Programs (AMCHP); the National Adolescent & Young Adult Health Information Center (NAHIC) at the University of California, San Francisco (UCSF); the State Adolescent Health Resource Center (SAHRC) at the University of Minnesota; and the University of Vermont National Improvement Partnership Network (NIPN).

Adolescent & Young Adult Health National Resource Center
The National Adolescent and Young Adult Health National Resource Center (AYAH-NRC) – supported by the Maternal and Child Health Bureau – was established in September 2014 to help states improve receipt and quality of preventive services among adolescents and young adults. The AYAH-NRC is housed at the National Adolescent and Young Adult Information Center at the University of California, San Francisco, in close partnership with: the Association of Maternal & Child Health Programs; the University of Minnesota State Adolescent Health Resource Center; and the University of Vermont National Improvement Partnership Network. The Center aims to promote adolescent and young adult health by strengthening the abilities of State Title V MCH Programs, as well as public health and clinical health professionals, to better serve these populations (ages 10-25).

Center for Adolescent Health & the Law
PO Box 3795 | Chapel Hill, NC 27515-3795
ph. 919.968.8850 | e-mail: info@cahl.org
http://www.cahl.org

The Center for Adolescent Health & the Law supports laws and policies that promote the health of adolescents and young adults and their access to comprehensive health care. Working nationally, the Center clarifies the complex legal and policy issues that affect access to health care for the most vulnerable youth in the United States. The Center provides information and analysis, publications, consultation, and training to health professionals, policy makers, researchers, and advocates who are working to protect the health of adolescents and young adults.

**Adolescent & Young Adult Health Care in Iowa**  
**A Guide to Understanding Consent & Confidentiality Laws**

Abigail English, JD  
Center for Adolescent Health & the Law

This guide provides a summary of legal consent requirements and confidentiality protections for adolescents and young adults in Iowa to inform health care providers and promote access to essential health care including preventive health services.

**INTRODUCTION**

Confidentiality protections encourage adolescents and young adults to seek the health care they need and safeguard their privacy when they receive services. The relationship between confidentiality of health information and consent for health care is important. The specific ways the law protects confidentiality depend on whether a patient is a minor or an adult and whether the patient can legally consent to their own care. Some adolescents are minors — under age 18 — and some are young adults — age 18 or older.

Young adults almost always may consent to their own care; minors may consent sometimes, but not always. Young adults are entitled to the same confidentiality protections under state and federal laws as other adults.

“Minor consent laws” allow minors to consent for their own care in specific situations and for specific services. Laws authorizing minors to consent and laws protecting confidentiality are closely linked but they do not always match each other. Adolescent minors who consent for their own care are entitled to many confidentiality protections; but these may be qualified or limited in ways that allow for disclosure of some information to parents or others.

Numerous federal and state laws contain confidentiality protections for health information. The interplay of law and ethics also is important in understanding confidentiality in the health care of adolescents and young adults. Careful analysis of the relevant state and federal laws, informed by sound ethical principles, can clarify these issues in Iowa as in other states.

**IMPORTANCE OF PROTECTING CONFIDENTIALITY**

There are numerous reasons to protect confidentiality for the health care communications and health information of adolescents and young adults. The most compelling is to encourage young people to seek necessary care on a timely basis and to provide a candid and complete health history when they do so. Additional reasons include supporting their developing sense of privacy and autonomy as well as protecting them from the humiliation and discrimination that can result from disclosure of confidential information. Offering confidential care can also help young people develop their capacity to engage independently with the health care system. Decades of research findings have documented the importance of privacy concerns for young people in the adolescent age group; additional research has found similar concerns among young adults. Overarching goals of confidentiality protection include promoting both the health of individual young people and the public health. One key element of reaching these goals is ensuring that young people receive the health care services they need.
Privacy concerns influence use of health care in many ways. Many adolescents are concerned about disclosure to their parents of information related to sexual behaviors, substance use, and mental health. This is true even though many adolescents voluntarily share a lot of health information with their parents and other trusted adults. Voluntary communication can be very helpful in supporting adolescents’ and young adults’ health; mandated communication and disclosure can be counterproductive unless they are necessary to protect the health of a young person. Specifically, concerns about confidentiality and disclosure can affect whether adolescents seek care, where they seek care, and how openly they talk with health care professionals. Some young adults also hesitate to use certain services unless privacy can be maintained. Concerns that confidentiality will not be protected can lead adolescents and young adults to forego or delay care or to be less than candid when they do see a health care provider.

The effect of privacy concerns has been especially well documented with respect to adolescents’ use of sexual health services, including care related to contraception, pregnancy, and sexually transmitted diseases (STDs). For example, one study found that almost all adolescents would consent to STD testing if their parents would not know, but only about one third would agree if their parents would or might know. According to another study, nearly one half of adolescents would stop using family planning clinic services if parental notification were mandatory. Yet, a national survey found that only a very small minority of adolescents would stop having sex if parental notification were mandatory for contraceptives, and a significant percentage would have riskier sex.

Health care professional organizations recognize the importance of confidentiality protections in health care. These organizations have adopted codes of ethics and issued policies that address privacy and confidentiality protections for patients generally, including young adults and adolescents. They also have adopted policies related to adolescent health care that address confidentiality for particular health care settings, special populations, and specific services—preventive health care, testing & treatment for STDs & HIV, contraception, pregnancy-related care, and other reproductive health services. These policies often speak to the importance of informing patients, including adolescents and their parents, about confidentiality and its limits.

Confidentiality is not absolute. To understand the scope and limits of legal and ethical confidentiality protections, it is important to clarify: what *may not* be disclosed because it is confidential and none of the exceptions to confidentiality apply; what *may* be disclosed based on the discretion of the health care professional; and what *must* be disclosed because there is another requirement, such as a reporting requirement, that overrides confidentiality.

### Emerging Confidentiality Challenges

Two sets of issues represent increasing challenges for protecting confidentiality in adolescent and young adult health care. The first set comprises the issues associated with billing and health insurance claims, particularly the use of explanations of benefits (EOBs) to communicate with health insurance policyholders. The second relates to the complex questions associated with use of and access to electronic health records (EHRs) and web portals. In these arenas, laws and policies as well as best practices are evolving rapidly. Thorough discussion of these issues is beyond the scope of this guide, but considering them is essential in any effort to protect confidentiality for adolescents and young adults. (See Appendix E)

### Iowa Health Care Consent Laws

The age of majority in Iowa is 18; anyone younger than age 18 is legally a minor. Young adults age 18 or older are allowed to consent for their own health care; their right to consent may be limited if they are cognitively impaired and unable to give informed consent. For adolescents who are minors, the consent of a parent or another authorized adult is generally required. There are many exceptions to this requirement contained in Iowa’s “minor consent laws.” (See Table 1 and Appendix A)

#### Minor Consent Laws in Iowa

Iowa has laws authorizing some minors to consent for health care based on their status. These laws allow minors who have received a court order of emancipation to consent for their own care. Married minors are considered adults who may consent for their own care. Minors who have been tried, convicted, and incarcerated as adults may also consent for their own care. Minors who are not explicitly authorized to consent for all of their own care based on their status may nevertheless be able to do so for specific services. (See Table 1 and Appendix A)

In addition, Iowa has several laws either allowing minors to receive certain services without prior parental consent or authorizing them to consent for specific health care services, including some preventive services. In particular these laws cover emergency care; contraception; prevention, diagnosis, and treatment of STDs; expedited partner therapy for chlamydia and gonorrhea; screening and treatment for HIV and AIDS; and treatment of substance-related disorders. Minors who have been victims of sexual abuse, sexual assault, or rape may consent to short term medical and mental health services. (See Table 1 and Appendix A)
Although Iowa does not have an explicit law authorizing minors to consent for prenatal care, childbirth delivery, and postnatal care or requiring parental consent, they may be able to do so based on the mature minor doctrine. Minors also may access emergency contraception without parental consent. Iowa law does require notification of a parent or a grandparent for a minor to receive an abortion; the law includes a judicial bypass and exceptions for medical emergencies, child abuse, or sexual abuse. (See Appendix F)

Minors in Special Situations

Some adolescent minors are in special situations or have health care needs that are not clearly addressed by the Iowa minor consent laws. These include, for example, adolescents who are victims of human trafficking or LGBTQ youth. Even though the state’s minor consent laws do not explicitly provide for these adolescents to consent for specific services such as transgender services, they are able to consent—on the same basis as any other minor—for other services that are covered by the minor consent laws or other laws, such as care for STDs and HIV, contraception, substance abuse services, and mental health counseling in some circumstances. Often these services are relevant to their special situations.

When adolescents are in foster care, special rules may determine who can give consent for their health care—their parents, the court, or their social worker. In Iowa, foster parents are not authorized to consent and consent must be obtained from the court or the adolescent’s parents, except that “[r]outine medical care of children (such as annual physicals, dental appointments, or care for a common illness) generally does not require a specific ‘authorization’ and can be obtained without parental permission.” When the Department of Human Services has legal custody, the social worker may give consent for emergency care. Foster children are allowed to receive contraception without the consent of a parent or foster parent. Also, foster children also should be able to consent for their own health care on the same basis as other youth.

Iowa Confidentiality Laws

Iowa laws include protections for the health care information of individuals of all ages, including minor adolescents and young adults. Iowa laws generally provide confidentiality protection for medical records and patients’ health information and usually require consent for release of the records or disclosure of the information subject to certain exceptions. Iowa laws include detailed protections for the confidentiality of mental health and substance abuse treatment records, with specific requirements for voluntary and mandatory disclosures. Iowa laws also contain provisions that are specific to the confidentiality of minors’ health information, particularly with respect to parents’ access to that information. (See Tables 2 & 3 and Appendix A)

Confidentiality Laws for Minors in Iowa

Confidentiality protections and consent requirements for minors are closely linked but not perfectly matched. Generally, when minors may consent for their own health care they can expect confidentiality protection, but there are exceptions. For example, the Iowa laws that allow minors to consent for their own health care also require a physician to notify parents if a minor has tested positive for HIV (See Table 1 and Appendix A) Also, confidentiality may be compromised via billing and health insurance claims as well as through access to electronic health records via web portals. (See Appendix E)
The Iowa Family Planning Program provides access to confidential family planning services for individuals of reproductive age, including adolescents beginning at age 12, who meet financial and other eligibility requirements. Adolescents who are enrolled in hawk-i, Iowa’s Children’s Health Insurance (CHIP) program, are eligible for the Iowa Family Planning Program.

One of the main exceptions to confidentiality is the requirement to report child abuse. In Iowa, a broad range of health care professionals and others who interact with children professionally are required to report reasonable suspicions that a child has been abused. The Iowa definition of reportable abuse includes physical, mental, and sexual abuse, as a result of action or inaction by person responsible for the child. Certain sexual offenses may also be reportable if committed by an individual other than someone not responsible for the child.

A question that often arises for health care professionals is whether voluntary sexual activity of minor adolescents must be reported as child abuse. This complex question has been carefully addressed elsewhere and is beyond the scope of this guide, but careful attention to the requirements of state reporting laws is always essential. A related concern of health care professionals is the age at which minors can participate in sexual activity without risk of criminal prosecution—sometimes referred to as “age of consent.” This issue is legally separate from the requirement to report child abuse and a detailed discussion also is beyond the scope of this guide.

These Iowa laws must be interpreted and applied in the context of the full range of federal laws that protect confidentiality and sometimes supersede state laws. Important federal confidentiality laws include the HIPAA Privacy Rule, as well as legal requirements for numerous federally funded health programs. Because the HIPAA Privacy Rule defers to state laws and other applicable laws on the question of when parents have access to their adolescent minor children’s health information, understanding the relationship between state and federal laws is essential.

**FEDERAL CONFIDENTIALITY LAWS**

Numerous federal laws contain confidentiality protections. These laws protect patients’ privacy in the health care system and the confidentiality of their health information. Federal confidentiality laws that are of particular importance for adolescent and young adult health care include the HIPAA Privacy Rule and FERPA, as well as statutes and regulations for the Title X Family Planning Program and Medicaid, and the rules for drug and alcohol programs. Confidentiality protections can also be found in requirements for other programs such as the Ryan White HIV/AIDS Program and federally qualified health centers (FQHCs).
HIPAA Privacy Rule

The HIPAA Privacy Rule—the federal medical confidentiality regulations issued in 2002 under the Health Insurance Portability and Accountability Act—protects the health care information of adolescents and young adults. The HIPAA privacy protections for young adults are the same as for other adults: they are entitled to access their protected health information and to control the disclosure of that information in some circumstances. Additional specific requirements apply to the information of adolescents who are minors.

When minors are authorized to consent for their own health care and do so, the HIPAA Privacy Rule treats them as “individuals” who are able to exercise rights over their own protected health information (PHI). Also, when parents have acceded to a confidentiality agreement between a minor and a health professional, the minor is considered an “individual” under the Rule.

Generally, the HIPAA Privacy Rule treats parents as the “authorized representative” and gives them access to the health information of their unemancipated minor children, including adolescents. Parents’ access is limited in situations that involve abuse or endangerment or when it would not be in the minor’s best interest. However, when minors are considered “individuals,” their parents are not necessarily their authorized representative. On the issue of when parents may have access to protected health information for minors who are considered “individuals” and who have consented to their own care, the Rule defers to other laws. Parents’ access to their adolescent minor child’s information in these circumstances depends on “state or other law.”

Thus, a health care provider must look to state laws or other laws to determine whether they specifically address the confidentiality or disclosure of a minor’s health information. State or other laws that explicitly require, permit, or prohibit disclosure of information to a parent are controlling. If state or other laws are silent on the question of parents’ access, a health care professional exercising professional judgment has discretion to determine whether or not to grant access. The relevant sources of state or other law that a health care provider must consider include all of the state and federal laws that contain confidentiality protections.

Additional provisions of the HIPAA Privacy Rule that are important for both adolescents and young adults are those that allow individuals to request restrictions on the disclosure of their PHI and to request that communications regarding their PHI occur in a confidential manner. Other protections address situations in which disclosure may be restricted to protect individuals who may be at risk for domestic violence or child abuse.

FERPA

When health care services are provided in a school setting, the legal framework for consent to treatment for adolescents remains generally the same as in other settings; however, different confidentiality rules may apply. In a school setting, the HIPAA Privacy Rule requirements must be understood in relation to the requirements of the Family Educational Rights and Privacy Act (FERPA), a federal statute that, with its implementing regulations, controls the disclosure of the educational records of students at most primary, secondary, and post-secondary schools. Health care professionals who provide services in schools often are uncertain whether they must follow the HIPAA Privacy Rule or FERPA. Two federal agencies—the Department of Health & Human Services and the Department of Education—have issued joint guidance that provides some clarification.
While the HIPAA Privacy Rule typically controls release of health information created by health care professionals, the HIPAA Privacy rule explicitly excludes from its purview health records that are part of an “education record” as that is defined under FERPA.42 FERPA defines “education record” in a way that sometimes can include health records created by a health care provider—such as a school nurse—employed by or acting on behalf of a school or university.

Thus, health records created by medical professionals employed by a school or university may be part of an “education record” and subject to FERPA rather than HIPAA. The most important implication of this is that parents have access to the education records of their minor children. Young adults, beginning at age 18, control access to their own education records under FERPA, including any health information. Health records created by medical professionals working in a school setting such as a school-based health center but employed by a health entity would usually be covered by HIPAA, not FERPA.43

**Title X Family Planning**

The confidentiality regulations for the federal Title X Family Planning Program44 are exceptionally strong and have protected adolescents as well as adults for nearly five decades. Federal Title X confidentiality protections take precedence over state requirements for parental consent or notification, allowing minors to receive family planning services at Title X sites without parental involvement.45 The regulations require that all information about individuals receiving services must be confidential and must not be disclosed without the individual’s documented consent, except as necessary to provide services to the patient or as required by law—and, even then, only with appropriate safeguards for confidentiality.46 When information is shared by Title X providers with other health care providers, care must be taken to understand the extent to which those other providers are bound by similar confidentiality requirements. Examples of disclosures that are often required by law include mandatory reporting of child abuse to child welfare or law enforcement,47 intimate partner violence to law enforcement,48 and STDs to public health authorities.49 In each of these situations, other specific confidentiality rules may apply.

On March 4, 2019 the U.S. Department of Health and Human Services published a final rule, “Compliance with Statutory Program Integrity Requirements,” that would significantly alter the federal regulations for the Title X Program.50 This guide does not discuss the changes that would result from implementation of the new rule. Detailed analysis of the rule and updates on its status are available elsewhere.51 The new rule has been challenged in numerous lawsuits.52

**Medicaid**

Federal Medicaid law contains safeguards against disclosure of confidential information.53 It also requires that Medicaid cover family planning “services and supplies” for all Medicaid enrollees of childbearing age, including “minors who can be considered to be sexually active.”54 These protections have been interpreted to provide significant protection for confidential access to family planning services for minors.55 State laws and policies also contain varied provisions that help to protect the privacy of Medicaid beneficiaries and their confidential health information. These provisions include both general confidentiality requirements and specific confidentiality protections for information related to family planning services, such as through states’ Medicaid family planning expansions that include coverage for minors as well as young adults.56
**Drug and Alcohol Programs**

Federal regulations—contained in 42 CFR Part 2 and often referred to as “Part 2” establish special confidentiality protections for substance use records;\(^{57,58}\) they apply to “substance use disorder programs” that meet certain very broad criteria of being “federally assisted.”\(^{59}\) The regulations protect both adolescent minors and young adults. When minors are allowed to consent for treatment under state law, they have independent rights under the federal regulations.\(^{60}\) For those providers and programs that must comply with the federal rules, the regulations impose strict confidentiality requirements that do not allow disclosure without the consent of the patient except in specific circumstances that pose a substantial threat to the life or physical wellbeing of the patient or another person.\(^{61}\) To the extent that these federal regulations are more protective of confidentiality, they take precedence over state law; if they are less protective, state law controls.\(^{62}\)

**Ryan White HIV/AIDS Program**

The Ryan White HIV/AIDS Program (Ryan White) supports some medical services for patients with HIV.\(^{63}\) Ryan White generally is a payer of last resort and fills the gaps for individuals with HIV who have no other source of coverage or face coverage limits. Ryan White service providers and patients have significant concerns about confidentiality, but like other federal funding programs such as Title X, the Ryan White law includes strong and explicit confidentiality protections.\(^{64}\)

**Federally Qualified Health Centers**

Federally qualified health centers (FQHCs) funded under Section 330 of the Public Health Service Act,\(^ {65}\) also frequently referred to as “community health centers,” often provide services for adolescents and young adults. For example, some FQHCs operate school-based health centers. FQHCs also are required to provide preventive health services, including voluntary family planning services and many of the preventive services recommended for adolescents and young adults;\(^ {66}\) and some FQHCs receive Title X funds to help provide family planning services. FQHCs are required to maintain the confidentiality of patient records\(^ {57} \) and, if they receive Title X Family Planning funds, to comply with Title X confidentiality regulations. The confidentiality regulation for FQHCs\(^ {68}\) contains language almost identical to the Title X confidentiality regulations.\(^ {69}\)

**Confidentiality and Preventive Services**

**Recommended preventive services for adolescents & young adults**

The U.S. Preventive Services Task Force (USPSTF) and Bright Futures have recommended clinical preventive services for adolescents and young adults in each of these categories:

- substance use
- sexual and reproductive health
- mental health
- nutrition and exercise
- immunizations
- safety and violence
In each category, the specific services recommended by the USPSTF vary for adolescents and for young adults; in Bright Futures the recommendations are for ages 11-21. The AYAH National Resource Center has issued a fact sheet on “Evidence-Based Clinical Preventive Services for Adolescents and Young Adults” that sets out the specific services recommended for the different age groups in each category.70

Many of the preventive services recommended for adolescents and young adults fall into categories about which young people have privacy concerns. These include at least some services in all recommended areas of prevention. Sometimes the privacy concerns are associated with a visit for a specific purpose, such as family planning; on other occasions concerns about confidentiality arise when sensitive issues, such as STDs, HIV, or substance use, are addressed during a well visit.

Not all preventive services raise heightened privacy concerns for adolescents and young adults; but when they do, it is important to understand when confidentiality can—and when it cannot—be assured. For young adults, who are able to consent to their own care and are entitled to the same confidentiality protections as other adults, any preventive health service they receive should be treated as confidential, meaning that information usually should not be disclosed to parents or others without their permission. For minor adolescents, if they are allowed to consent for their own care under the Iowa minor consent laws, they can usually expect confidentiality, subject to any disclosures that are specifically permitted or required by law. For example, Iowa laws allow minors to consent for services to prevent STDs, which include HPV vaccination. For both adolescents and young adults, other legal and ethical disclosure obligations, such as when a patient is dangerous to self or others, must be considered. There are no specific confidentiality requirements for preventive services; the extent of confidentiality protection depends on the service as well as the age and other characteristics of the young person.

**CONCLUSION**

Confidentiality in adolescent and young adult health care is an important element in protecting the health of individual young people and the public health. Decades of research have found that privacy protection encourages young people to seek essential health care and speak openly with their health care providers. Many state and federal laws as well as ethical guidelines require confidentiality protection and support the rights of adolescents and young adults to receive confidential health care including many preventive health services.

APPENDIX A: IOWA CONSENT & CONFIDENTIALITY LAWS FOR MINORS

This appendix contains brief summaries of Iowa consent and confidentiality laws that apply to health services received by minors.

Minor Consent Based on Status

Age of Majority

Iowa Code § 599.1
The age of majority is 18. Married minors are deemed to have attained the age of majority. Minors tried, convicted, and incarcerated as adults are deemed to have attained the age of majority.

Emancipated Minor

Iowa Code §§ 232C.1 and 232C.3
An emancipated minor is one who is age 16 or older, is absent from the minor's parents with the consent of the parents, is self-supporting, has met other criteria, and has received a court declaration of emancipation based on a determination by the court that emancipation is in the best interests of the minor.

Iowa Code § 232C.4
A minor who has received an order of emancipation from a court has the right to consent for medical, dental, and psychiatric care.

Married Minor

Iowa Code § 595.2
Minors age 16 and 17 may marry with parental consent or court approval.

Iowa Code § 599.1
Married minors are considered adults and therefore would be able to consent for their own health care.

Incarcerated Minor

Iowa Code § 599.1
Minors who have been tried, convicted, and incarcerated as adults may consent for medical care, services, and treatment.

Minor Consent Based on Services

Emergency Services

Iowa Code § 147A.10/2
A minor may receive emergency medical services without the prior consent of a parent or other person authorized to give consent.
Contraception/Family Planning

**Iowa Code §141A.7(3)**

A minor may consent for voluntary contraceptive services provided by a physician, osteopath, or family planning clinic.

Note: Adolescents may be eligible for the Iowa Family Planning Program, which provides confidential family planning services to individuals of reproductive age beginning at age 12 who meet financial and other eligibility requirements.71

Note: Under FDA rules for emergency contraception, Plan B and its generic equivalents are available “over the counter” without a prescription for individuals of any age; Ella is available with a prescription.72

Pregnancy Related Care

Note: Iowa does not have an explicit statute or other law explicitly allowing or prohibiting minors from consenting to prenatal care, delivery, and postnatal care; they may be able to do so if they are capable of giving informed consent. (See Appendix F)

Sexually Transmitted Disease

**Iowa Code § 139A.35**

A minor may consent to medical care and services for the prevention, diagnosis, and treatment of a sexually transmitted disease or infection by a hospital, clinic, or health care provider. The services must be provided by or under the supervision of a physician, osteopath, physician assistant, or nurse practitioner.

**Iowa Code § 141A.7(3)**

A minor may consent for voluntary screening or treatment for sexually transmitted diseases provided by a physician, osteopath, or family planning clinic.

Expedited Partner Therapy

**Iowa Code § 139A.41**

A physician, physician assistant, or nurse practitioner who diagnoses a sexually transmitted chlamydia or gonorrhea infection in a patient may prescribe, dispense, or provide prescription oral antibiotic drugs to the patient’s sexual partner(s) without examination of the partner(s). If the patient is unwilling or unable to deliver the drugs to the partner(s), the health care professional may provide the drugs to the health department or local disease prevention investigation staff for delivery. (This section has been interpreted by the Iowa AG to apply to minors.)

HIV/AIDS

**Iowa Code § 141A.7(3)**

A minor may consent for screening and treatment for HIV infection provided by a physician, osteopath, or family planning clinic. Post-test counseling must be provided to individuals who test positive. Prior to an HIV test a minor must be informed that the minor’s legal guardian or parent will be notified of a positive test result, unless
Drug/Alcohol Treatment

*Iowa Code § 125.33(1)*
A minor may consent for voluntary treatment and rehabilitation services provided by a facility, physician, or osteopath for a substance-related disorder (including disorders related to alcohol and other controlled substances).

Tobacco Cessation Services

*Iowa Code § 142A.11*
A minor age 12 or older may consent for tobacco cessation coaching services pursuant to a tobacco cessation telephone and internet-based program approved by the Department of Public Health.

Sexual Assault/sexual Abuse Services

*Iowa Code § 915.35(1) & (2)*
A minor who has been the victim of sexual abuse, unlawful sexual conduct, or a forcible felony may receive immediate or short-term medical or mental health services from a licensed professional without prior parental consent.

*Iowa Code § 915.35(3)*
The professional must notify the victim if a child abuse report will be required to be filed.

Non-medical Services

According to the Iowa Attorney General’s office, a minor may consent to non-medical public health services such as educational services under the WIC program.

Confidentiality & Disclosure

HIV/AIDS

*Iowa Code 141A.7(3)*
Prior to an HIV test a minor must be informed that the minor’s legal guardian or parent will be notified of a positive test result, unless the testing facility is precluded by federal statute, regulation, or CDC guidelines from notifying the parent or legal guardian. Testing facilities where minors are tested must have available a program to assist minors and parents with the notification process.

*Iowa Code § 147A.9:*
Information related to HIV and AIDS is strictly confidential medical information. This section contains the specific circumstances in which such information can be disclosed.
Substance Use/Abuse

Iowa Code §125.33(1)
If a minor seeks voluntary substance abuse treatment or rehabilitation, the fact that the minor sought treatment or rehabilitation or is receiving treatment or rehabilitation services shall not be reported or disclosed to the parents or legal guardian of such minor without the minor's consent.

Iowa Code § 125.37
The records of substance abuse treatment facilities are confidential and privileged to the patient, subject to certain exceptions, such as medical emergencies or care coordination not restricted by federal law or regulation.

Mental Health

Iowa Code Ch. 228
This chapter contains detailed requirements governing the confidentiality and disclosure of mental health and psychological information.

Iowa Code § 228.2
This section contains detailed provisions protecting mental health information from disclosure without the consent of the patient.

Iowa Code § 228.3
This section contains the requirements for voluntary disclosures of mental health information, i.e. disclosures authorized by the patient or the patient’s legal representative.

Iowa Code § 228.6
This section contains the requirements for compulsory disclosures, such as “to meet the compulsory reporting or disclosure requirements of other state or federal law relating to the protection of human health and safety.”

Iowa Code § 228.8
This section contains the provisions for disclosures to family members, including parents, if certain conditions are met, such as the disclosure being necessary for the care of a person with a chronic mental illness.
Child Abuse Reporting

Definitions

Iowa Code § 232.68
Iowa laws defines child abuse to include physical, mental, and sexual abuse that occurs as a result of the acts or omissions of a person responsible for the care of a child.

Required Reports

Iowa Code § 232.69
A broad range of health care professionals and other individuals who have responsibility for and contact with children in the course of their employment are required to make a report when they reasonably believe a minor has suffered abuse. Mandated reporters must report certain sexual offenses committed other than by a person responsible for the care of the minor against a minor under age 12, and may report such offenses when committed against a minor age 12 or older.

Note: Sexual activity that involves a minor may be reportable under the child abuse reporting laws. A detailed analysis is beyond the scope of this guide, but important considerations include the age of each of the partners, the specific activity involved, whether the sexual activity was voluntary, and other factors.73
APPENDIX B: FEDERAL CONFIDENTIALITY LAWS

This appendix contains brief summaries and excerpts of the text of selected federal statutes and regulations that provide confidentiality protection for health information and services provided to adolescent minors and young adults.

HIPAA Privacy Rule

The HIPAA Privacy Rule contains protections for both minors and young adults. In 45 C.F.R. § 160.502(g)(3) the rule specifies when a minor is considered an individual who has rights with respect to their own protected health information PHI and whose parent is not necessarily their personal representative with access to their PHI. In 45 C.F.R. § 160.502(g)(5) the rule specifies when a parent is not necessarily the personal representative of a minor due to abuse, neglect, domestic violence, or endangerment, or if it would not be in the minor’s best interest. In 45 C.F.R. §§ 160.502(h) and 160.522 the rule specifies special confidentiality protections for individuals: the right to request restrictions on disclosure of PHI; and the right to request confidential communications.

“. . . (g)(1) Standard: Personal representatives. As specified in this paragraph, a covered entity must, except as provided in paragraphs (g)(3) and (g)(5) of this section, treat a personal representative as the individual for purposes of this subchapter.

(2) Implementation specification: adults and emancipated minors. If under applicable law a person has authority to act on behalf of an individual who is an adult or an emancipated minor in making decisions related to health care, a covered entity must treat such person as a personal representative under this subchapter, with respect to protected health information relevant to such personal representation.

(3)(i) Implementation specification: unemancipated minors. If under applicable law a parent, guardian, or other person acting in loco parentis has authority to act on behalf of an individual who is an unemancipated minor in making decisions related to health care, a covered entity must treat such person as a personal representative under this subchapter, with respect to protected health information relevant to such personal representation, except that such person may not be a personal representative of an unemancipated minor, and the minor has the authority to act as an individual, with respect to protected health information pertaining to a health care service, if:

(A) The minor consents to such health care service; no other consent to such health care service is required by law, regardless of whether the consent of another person has also been obtained; and the minor has not requested that such person be treated as the personal representative;

(B) The minor may lawfully obtain such health care service without the consent of a parent, guardian, or other person acting in loco parentis, and the minor, a court, or another person authorized by law consents to such health care service; or

(C) A parent, guardian, or other person acting in loco parentis assents to an agreement of confidentiality between a covered health care provider and the minor with respect to such health care service.

(ii) Notwithstanding the provisions of paragraph (g)(3)(i) of this section:

(A) If, and to the extent, permitted or required by an applicable provision of State or other law, including applicable case law, a covered entity may disclose, or provide access in accordance with § 164.524 to, protected health information about an unemancipated minor to a parent, guardian, or other person acting in loco parentis;
(B) If, and to the extent, prohibited by an applicable provision of State or other law, including applicable case law, a covered entity may not disclose, or provide access in accordance with §164.524 to, protected health information about an unemancipated minor to a parent, guardian, or other person acting in loco parentis; and

(C) Where the parent, guardian, or other person acting in loco parentis, is not the personal representative under paragraphs (g)(3)(i)(A), (B), or (C) of this section and where there is no applicable access provision under State or other law, including case law, a covered entity may provide or deny access under §164.524 to a parent, guardian, or other person acting in loco parentis, if such action is consistent with State or other applicable law, provided that such decision must be made by a licensed health care professional, in the exercise of professional judgment.

. . .

(5) Implementation specification: Abuse, neglect, endangerment situations. Notwithstanding a State law or any requirement of this paragraph to the contrary, a covered entity may elect not to treat a person as the personal representative of an individual if:

(i) The covered entity has a reasonable belief that:

(A) The individual has been or may be subjected to domestic violence, abuse, or neglect by such person; or

(B) Treating such person as the personal representative could endanger the individual; and

(ii) The covered entity, in the exercise of professional judgment, decides that it is not in the best interest of the individual to treat the person as the individual’s personal representative.

(h) Standard: Confidential communications. A covered health care provider or health plan must comply with the applicable requirements of §164.522(b) in communicating protected health information.

. . .”

45 C.F.R. § 164.522 Rights to request privacy protection for protected health information

“(a)(1) Standard: Right of an individual to request restriction of uses and disclosures. (i) A covered entity must permit an individual to request that the covered entity restrict:

(A) Uses or disclosures of protected health information about the individual to carry out treatment, payment, or health care operations; and

(B) Disclosures permitted under § 164.510(b).

(ii) Except as provided in paragraph (a)(1)(vi) of this section, a covered entity is not required to agree to a restriction.

(iii) A covered entity that agrees to a restriction under paragraph (a)(1)(i) of this section may not use or disclose protected health information in violation of such restriction, except that, if the individual who requested the restriction is in need of emergency treatment and the restricted protected health information is needed to provide the emergency treatment, the covered entity may use the restricted protected health information, or may disclose such information to a health care provider, to provide such treatment to the individual.

(iv) If restricted protected health information is disclosed to a health care provider for emergency treatment under paragraph (a)(1)(iii) of this section, the covered entity must request that such health care provider not further use or disclose the information.

(v) A restriction agreed to by a covered entity under paragraph (a) of this section, is not effective under this subpart to prevent uses or disclosures permitted or required under §§164.502(a)(2)(ii), 164.510(a) or 164.512.

(vi) A covered entity must agree to the request of an individual to restrict disclosure of protected health information about the individual to a health plan if:

(A) The disclosure is for the purpose of carrying out payment or health care operations and is not otherwise required by law; and
(B) The protected health information pertains solely to a health care item or service for which the individual, or person other than the health plan on behalf of the individual, has paid the covered entity in full.

(2) Implementation specifications: Terminating a restriction. A covered entity may terminate a restriction, if:

(i) The individual agrees to or requests the termination in writing;
(ii) The individual orally agrees to the termination and the oral agreement is documented; or
(iii) The covered entity informs the individual that it is terminating its agreement to a restriction, except that such termination is:
   (A) Not effective for protected health information restricted under paragraph (a)(1)(vi) of this section; and
   (B) Only effective with respect to protected health information created or received after it has so informed the individual.

(3) Implementation specification: Documentation. A covered entity must document a restriction in accordance with §160.530(j) of this subchapter.

(b)(1) Standard: Confidential communications requirements. (i) A covered health care provider must permit individuals to request and must accommodate reasonable requests by individuals to receive communications of protected health information from the covered health care provider by alternative means or at alternative locations.

(ii) A health plan must permit individuals to request and must accommodate reasonable requests by individuals to receive communications of protected health information from the health plan by alternative means or at alternative locations, if the individual clearly states that the disclosure of all or part of that information could endanger the individual.

(2) Implementation specifications: Conditions on providing confidential communications.

(i) A covered entity may require the individual to make a request for a confidential communication described in paragraph (b)(1) of this section in writing.

(ii) A covered entity may condition the provision of a reasonable accommodation on:
   (A) When appropriate, information as to how payment, if any, will be handled; and
   (B) Specification of an alternative address or other method of contact.

(iii) A covered health care provider may not require an explanation from the individual as to the basis for the request as a condition of providing communications on a confidential basis.

(iv) A health plan may require that a request contain a statement that disclosure of all or part of the information to which the request pertains could endanger the individual.”

Title X Family Planning Services

42 C.F.R. § 59.11 – Confidentiality

“All information as to personal facts and circumstances obtained by the project staff about individuals receiving services must be held confidential and must not be disclosed without the individual’s documented consent, except as may be necessary to provide services to the patient or as required by law, with appropriate safeguards for confidentiality. Otherwise, information may be disclosed only in summary, statistical, or other form which does not identify particular individuals.”

*On March 4, 2019 the U.S. Department of Health and Human Services published a final rule, “Compliance with Statutory Program Integrity Requirements,” that would significantly alter the federal regulations for the Title X Program. This guide does not discuss the changes that would result from implementation of the new rule. Detailed analysis of the rule and updates on its status are available elsewhere. The new rule has been challenged in numerous lawsuits.*
**Medicaid**

42 U.S.C. § 1396a(a)(7)
State Medicaid plans are required to provide “safeguards for confidentiality for information concerning applicants and recipients.” [Note: The section contains additional specific requirements and exceptions.]

42 U.S.C. § 1396d(a)(4)(C)
For purposes of the Medicaid program, this title [42 USCS §§ 1396 et seq.]-
“(a) Medical assistance. The term "medical assistance" means payment of part or all of the cost of the following care and services . . . (4) . . . (C) family planning services and supplies furnished (directly or under arrangements with others) to individuals of childbearing age (including minors who can be considered to be sexually active) who are eligible under the State plan and who desire such services and supplies[.]”

**Drug & Alcohol Programs**

42 C.F.R. § 2.14. Minor patients
“(a) State law not requiring parental consent to treatment. If a minor patient acting alone has the legal capacity under the applicable state law to apply for and obtain substance use disorder treatment, any written consent for disclosure authorized under subpart C of this part may be given only by the minor patient. This restriction includes, but is not limited to, any disclosure of patient identifying information to the parent or guardian of a minor patient for the purpose of obtaining financial reimbursement. These regulations do not prohibit a part 2 program from refusing to provide treatment until the minor patient consents to the disclosure necessary to obtain reimbursement, but refusal to provide treatment may be prohibited under a state or local law requiring the program to furnish the service irrespective of ability to pay.

(b) State law requiring parental consent to treatment.

(1) Where state law requires consent of a parent, guardian, or other individual for a minor to obtain treatment for a substance use disorder, any written consent for disclosure authorized under subpart C of this part must be given by both the minor and their parent, guardian, or other individual authorized under state law to act in the minor's behalf.

(2) Where state law requires parental consent to treatment, the fact of a minor's application for treatment may be communicated to the minor's parent, guardian, or other individual authorized under state law to act in the minor's behalf only if:

(i) The minor has given written consent to the disclosure in accordance with subpart C of this part; or

(ii) The minor lacks the capacity to make a rational choice regarding such consent as judged by the part 2 program director under paragraph (c) of this section.

(c) Minor applicant for services lacks capacity for rational choice. Facts relevant to reducing a substantial threat to the life or physical well-being of the minor applicant or any other individual may be disclosed to the parent, guardian, or other individual authorized under state law to act in the minor's behalf if the part 2 program director judges that:

(1) A minor applicant for services lacks capacity because of extreme youth or mental or physical condition to make a rational decision on whether to consent to a disclosure under subpart C of this part to their parent, guardian, or other individual authorized under state law to act in the minor's behalf; and

(2) The minor applicant's situation poses a substantial threat to the life or physical well-being of the minor applicant or any other individual which may be reduced by communicating relevant facts to the minor's parent, guardian, or other individual authorized under state law to act in the minor's behalf.”
Appendix C: Key Questions for Confidentiality Protection

This appendix contains questions that are important to consider in order to determine whether an individual young person in Iowa can obtain a particular service confidentially. These questions are based on the Iowa and federal laws that establish consent requirements and confidentiality protections for adolescent and young adult health services. Depending on the specific situation additional considerations, and laws not discussed in this guide, may affect whether the young person may receive confidential services.

▪ Is the youth an adult or a minor?
  ➢ Young adults are generally able to consent for their own care and are entitled to the same confidentiality protections as other adults.
  ➢ Minor adolescents may be able to consent for their own care based on their status or the services they are seeking; confidentiality protection may depend on whether they can consent for their own care, the specific service they receive, where they receive the service, and the source of the payment.

▪ If the young person is a minor, what is their status?
  ➢ Emancipated
  ➢ Married
  ➢ Incarcerated

▪ What service is the young person seeking?
  ➢ Emergency services
  ➢ Contraception
  ➢ STD services
  ➢ HIV/AIDS services
  ➢ Pregnancy care
  ➢ Mental health services
  ➢ Drug/alcohol treatment
  ➢ Sexual assault services
  ➢ Tobacco cessation services
  ➢ Immunizations

▪ Where is the service being provided?
  ➢ General medical office, health center, or hospital outpatient clinic
  ➢ Title X family planning health center
  ➢ Drug or alcohol treatment program

▪ What is the source of the payment?
  ➢ Private/commercial health insurance
  ➢ Self-pay
  ➢ Parent payment
  ➢ Medicaid/hawk-i
  ➢ Title X Family Planning Program
  ➢ Iowa DHS State Family Planning Program
  ➢ Other
APPENDIX D: LEGAL RESOURCES FOR ADOLESCENT & YOUNG ADULT HEALTH & THE LAW IN IOWA

Legal Action Center. Substance Use: Confidentiality Resources. https://lac.org/resources/substance-use-resources/confidentiality-resources/.

APPENDIX E: RESOURCES ON CONFIDENTIALITY, HEALTH INSURANCE, AND ELECTRONIC HEALTH RECORDS

Confidentiality & Insurance

Extensive resources on confidentiality and insurance were developed by the National Family Planning & Reproductive Health Association as part of a three-year research project, Confidential & Covered. These resources are available on the project’s website at https://www.confidentialandcovered.com/. The following publications on that website specifically address legal and policy issues related to confidentiality and insurance:

- English A, Mulligan A, Coleman C. Protecting Patients’ Privacy in Health Insurance Billing & Claims: An Illinois Profile (2017) [Note: Similar profiles were published for 5 other states studied as part of the Confidential & Covered project: Maryland and Oregon in 2017; California, Colorado, and Washington in 2016]

Confidentiality & Electronic Health Records

APPENDIX F: CONSENT FOR CONTRACEPTION & PREGNANCY CARE

Iowa law permits minors to consent for contraception.74 Also, in Iowa adolescents age 12 or older may be eligible for the Iowa Family Planning Program (previously the Iowa Family Planning Waiver), which provides confidential family planning services to individuals of reproductive age who meet financial and other eligibility requirements.75

Iowa law does not explicitly authorize minors to consent for pregnancy related care such as prenatal care, delivery, and postnatal care. However, no Iowa statute, regulation, or court decision specifically prohibits a minor from consenting or explicitly requires parental consent when minors receive these services. In the absence of such a law, it would be reasonable to conclude that minors who have the capacity to give informed consent may receive pregnancy related care based on their own consent. Iowa law does require notification of one parent or a grandparent for a minor to receive an abortion, but the law includes a waiver allowing for a judicial bypass, and exceptions in medical emergencies or child abuse or sexual abuse.76

The federal Title X Family Planning Program requires that family planning services, including contraceptive services, be offered to adolescents; family participation must be encouraged but is not required.77 Title X funded services, including services for adolescents, must be confidential.78

Federal Medicaid law contains safeguards against disclosure of confidential information.79 It also requires that Medicaid cover family planning “services and supplies” for all Medicaid enrollees of childbearing age, including “minors who can be considered to be sexually active.” These protections have been interpreted to provide significant protection for confidential access to family planning services for minors.80

An additional source of possible support for allowing minors to consent for contraceptive services and pregnancy related care is the “mature minor” doctrine. The mature minor doctrine was developed in court decisions and is part of the common law. Under the mature minor doctrine, courts in some states have determined that a medical practitioner should not be held liable solely on the basis of failure to obtain parental consent when non-negligent care that is not high risk, is within the mainstream of established medical opinion, and is for the minor’s benefit, is provided to a mature minor.82 A mature minor is generally considered to be an older adolescent who is capable of giving informed consent (i.e., the patient is able to understand the risks and benefits of any proposed treatment or procedure and its alternatives and is able to make a voluntary choice among the alternatives) minor doctrine. Nevertheless, a strong rationale has been articulated that recognition of a mature minor’s capacity to make medical decisions is consistent with research on adolescent development.83

The constitutional right of privacy also supports minors’ access to contraceptive services. The right of privacy protects the decision to use contraceptives by both married and unmarried individuals;84 and the right of privacy with respect to decisions about procreation has been extended to minors as well as adults.85 In Carey v. Population Services International, the U.S. Supreme Court recognized that minors’ constitutional right of privacy encompasses access to contraceptives.86 In other cases, federal courts have held that minors have constitutional privacy interests87 and that providing contraception information and services to minor children does not violate the rights of their parents.88
APPENDIX G: 25 YEARS OF AYA CONFIDENTIALITY STUDIES—A BIBLIOGRAPHY

This appendix lists selected articles from the past 25 years that form an important part of the evidence base of research findings supporting confidentiality in adolescent and young adult health care.

Adolescent and Young Adult Perspectives

* Special thanks are extended to Carol A. Ford, MD, of Children’s Hospital of Philadelphia and to Justine Po of USCF for their assistance in developing this appendix.
