Community Priority

Osceola County

Goal #1 To promote immunizations to all adolescents (ages 13-15 years) served by our agency.

National Alignment

State Alignment

The average immunization rate for fully immunized adolescents (ages 13-15 years) in the state of Iowa is 45%.

Objective 1-1 To increase the immunization rate of adolescents who are fully immunized with 1 Tdap, 3 Hep B, 2 MMR, 2 Varicella and 1 Meningitis and served by our agency to achieve a rate of 25% by December, 2020.

Progress notes: Agency provided school based clinics in 2016-2017, however, no longer doing school-based clinics due to transporting issues and vaccine stability. Have full cooperation and great working relationship with school nurse and support of BOH.
