Report Date

June 24, 2019

Progress on Strategy

Complete On track Off track No progress

Progress notes: The County Community members along with Law Enforcement within the county have worked on Mental Health transportation to other health providers with in the state to find better placement. Also the local hospital MercyOne New Hampton has completed building project which included psych holding room in the ER till placement is found for individuals. Also the Mental Health transportation is done by successful mental health collaboration instead of the sheriff's office at all times. Mental health awareness has increase on the local with Life Solution program that started at MercyOne for older individuals that have had mental health crisis that are able to seek counseling, along with group counseling for coping and support. Integrated Mental Health Youth services have increase with all county school districts to solve behavior issues that affect the child as young as kindergarten to 18. Giving youth coping skills with intervention for the school staff. Northeast Iowa Area Agency on Aging has started support group for adults with mental health d/t the aging process which is working well.
