What factors determine our health?

Definitions of HiAP

A **collaborative** approach to improving the health of all people by incorporating **health considerations** in decision-making across sectors and policy areas.

How can decisions impact our health?

Why HiAP?

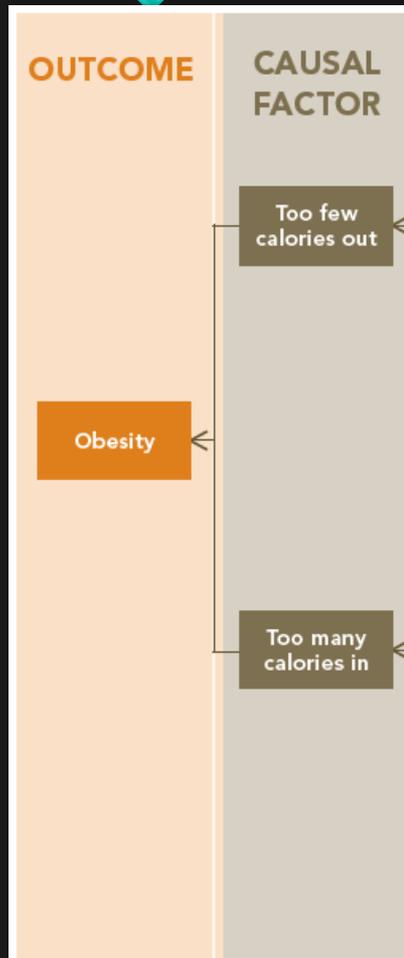

- Cross-sector collaboration can ultimately result in increased efficiencies and effectiveness.
- Our greatest health challenges are highly complex and often linked.
 - “Wicked problems” or “Social Messes”

Top 10 Public Health Achievements of the 20th Century

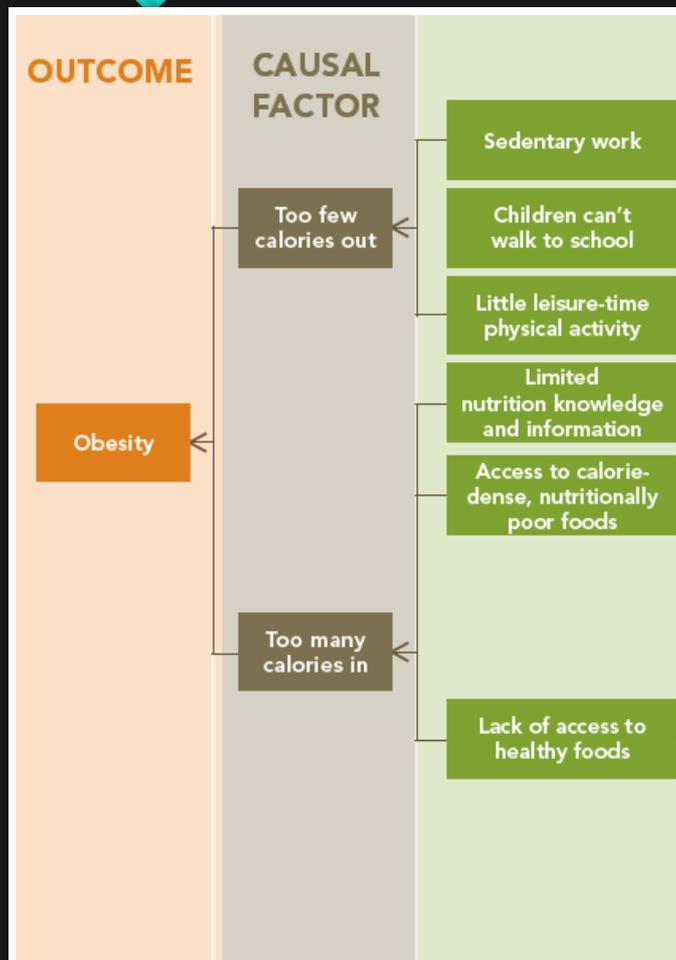

- Immunizations
- Motor vehicle safety
- Workplace safety
- Control of infectious diseases
- Declines in death from heart disease and stroke
- Safer and healthier foods
- Healthier mothers and babies
- Family planning
- Fluoridation of drinking water
- Tobacco as a health hazard

The how-to of HiAP

- ▶ **Health considerations in the decision making process** → How does a prospective-decision potentially impact population health?
- ▶ HiAP is **upstream** – the focus is on addressing potential health impacts early in the decision processes
- ▶ HiAP is **comprehensive** – all sectors, all stages of policy processes, all levels of government

Key Elements of HiAP

- Promote health, equity, and sustainability.
- Support intersectoral collaboration.
- Benefit multiple partners.
- Engage stakeholders.
- Create structural or process change.

HiAP Resources

The screenshot displays the Iowa Public Health Association website. The header features the IPHA logo and the text "Iowa Public Health Association". The main content area is titled "Health in All Policies" and includes a detailed paragraph explaining the HiAP approach. Below this, there are two featured articles: "Health in All Policies: A Guide for State and Local Governments" and "From Start to Finish: How to Permanently Improve Government through Health in All Policies". A left-hand navigation menu lists various website sections.

Health in All Policies

Health in All Policies (HiAP) is a collaborative approach to improving the health of all people by incorporating health considerations into decision-making across sectors and policy areas. The goal of Health in All Policies is to ensure that decision-makers are informed about the health, equity, and sustainability consequences of various policy options during the policy development process. A Health in All Policies approach identifies the ways in which decisions in multiple sectors affect health, and how better health can support the goals of these multiple sectors. It engages diverse governmental partners and stakeholders to work together to promote health, equity, and sustainability, and simultaneously advance other goals such as promoting job creation and economic stability, transportation access and mobility, a strong agricultural system, and educational attainment. There is no one "right" way to implement a Health in All Policies approach, and there is substantial flexibility in process, structure, scope, and membership.
